

PRISYML^{LS} LAUNCH NEW GLOBAL COMPLIANCE SOLUTION INCLUDING MSDS SOFTWARE AND CHEMICAL LABELING SOFTWARE FOR CHEMICAL APPLICATIONS.

PRISYML^{LS}, a leading product identification and labeling Solutions Company has launched PRISYML **Chemica** a suite of hazard documentation management modules for global compliance which includes MSDS software and chemical labeling software. PRISYML **Chemica** allows companies to reduce manual processes for the management and distribution of hazard communication documents, saving time and therefore costs as well as reducing manual errors.

PRISYML **Chemica** makes it possible to perform chemical classifications, produce Material Safety Data Sheets, labels and transit (TREM) cards in different languages and update all these documents with the latest regulatory changes on a single, user friendly platform.

A series of prompts and templates can be set up to make it easy for users to author and design hazard documents in PRISYML **Chemica**. Once the classification has been performed, the relevant MSDS written and labels designed in PRISYML **Chemica**, users can select a product on the system which automatically calls up the relevant MSDS, TREM cards and labels for distribution. PRISYML **Chemica** can be used to keep all these documents updated with the latest regulatory changes and automatically include the required languages when the user selects a destination on the system.

PRISYML **Chemica** includes security features such as time elapsing passwords, lockable label formats and approval processes to protect documents from tampering and ensure only approved documents are distributed.

The PRISYML^{LS} team has over 20 years experience in delivering high quality labeling and auto-identification solutions to companies in a wide range of industries. With offices in the UK and USA as well as an extensive network of international partners worldwide, the company is able to provide barcode, labeling, RFID and print solutions on a global scale. The company boasts a comprehensive range of software and consumables; from intuitive label design and print to automated track and trace systems.

PRISYML^{LS} is a division of PRISYML^{ID}. For further information please contact Martyn Kerluk at (704)-409-2351 or email info@prisymidinc.com. For additional descriptions, please visit www.prisymidinc.com
