

PRISYMLS^{LS} AND HONEYWELL ANNOUNCE PARTNERSHIP FOR MEDICAL SUPPLIES MANUFACTURING

Leading labeling and auto-identification specialist, PRISYMLS^{LS} and Honeywell – a leading global automation and control solutions provider – have signed a partnership agreement to provide a complete solution, which combines compliant labeling capabilities within production management software, for manufacturers in the life sciences industry. The agreement brings together the PRISYMLS^{LS} team's 20 years experience in validated and FDA compliant labeling systems and Honeywell's expertise in MES and automation solutions for life sciences manufacturing.

The agreement means the company's powerful PRISYML *Medica* software will now be offered as a module option or upgrade to the Honeywell POMSnet MES application for Clinical Supplies Manufacturing. PRISYML *Medica* label design and production software, which is specially developed to meet the FDA's 21 CFR Part 11 regulations, will compliment Honeywell's product portfolio to provide a seamless solution for customers.

Vince Postill, Business Development Director of PRISYMLS^{LS}, explains: "We are very excited about our agreement with Honeywell. We believe together we can offer customers some significant benefits and new opportunities."

By pulling together their knowledge and experience in their respective fields, both parties believe they can offer an efficient and worry-free complete FDA compliant solution to the life sciences industry.

PRISYML *Medica* uses high levels of security and data encryption to ensure systems integrity and regulatory compliance at all times. It is able to record critical activities and electronically links them to individual users, along with time and date stamping.

PRISYML *Medica* provides a totally secure environment for label design, approval, automatic gathering of variable data and label printing. It is developed, tested and documented in accordance with strict FDA and GAMP (Good Automated Manufacturing Practice) guidelines and supplied with full life cycle documentation. An additional module is also available from PRISYMLS^{LS} for managing and labeling Clinical Trials.

Honeywell is an industry leader in MES and automation solutions for life sciences. Its POMSnet execution system, specifically designed for pharmaceutical and biologics manufacturing, controls and tracks all aspects of production, secures predictable quality, enforces Good Manufacturing Practices (GMP) and provides a complete history for regulatory compliance. For more information on Honeywell and its products visit www.honeywell.com/ps.

The PRISYM^{LS} team has 20 years experience in delivering high quality labeling and auto-identification solutions to a wide range of industries. With offices in the UK, USA and Sri Lanka as well as an extensive network of international partners worldwide, the company is able to provide barcode, labeling, RFID and print solutions on a global scale.

PRISYM^{LS} is a division of PRISYM^{ID}. For further information please contact Martyn Kerluk at (704)-409-2351 or email info@prisymidinc.com. For additional descriptions, please visit www.prisymidinc.com
